INTERNATIONAL TRIBUNAL OF RIGHTS OF NATURE

A unique, citizen-created initiative to testify publicly about the destruction of the Earth and propose a systemic alternative to environmental protection and current environmental laws.

The “International tribunal for Rights of Nature” was launched by GARN in 2014. First session of the tribunal, presided by Dr. *Vandana Shiva*, convened hearings in Quito, Ecuador in January 2014 during the Global Rights of Nature Summit. The second session held in Lima, Peru in December 2014 during the UNFCCC-COP20 was presided by *Alberto Acosta*.

The Tribunal is a unique citizen-created initiative. It gives people from all around the world the opportunity to testify publicly as to the destruction of the Earth, destruction that governments and corporations not only allow, but in some cases encourage.

The Tribunal provides **a systemic alternative to environmental protection, acknowledging that ecosystems have the right to exist, persist, maintain and regenerate their vital cycles**, with legal standing in a court of law. The Tribunal has a strong focus on enabling **Indigenous Peoples to share their unique concerns** and solutions about land, water, air and culture with the global community.

The Tribunal features internationally renowned lawyers and leaders for planetary justice, who will hear emblematic cases addressing issues such as climate change, false solutions, GMOs, fracking, extractive industries and other environmental violations.

They formulate judgments and recommendations for the Earth’s protection and restoration based on the **Universal Declaration of the Rights of Mother Earth**. Among other things, the Declaration binds us to respect the integrity of the vital ecological processes of the Earth. Accordingly, the Declaration also helps advance **proposed amendments to the Rome Statute of the International Criminal Court to recognize the crime of Ecocide**.

The International Tribunal of the Rights of Nature is part of an effort to promote a change of consciousness and highlight the need to expand the international legal framework and national laws to ensure the safety of planet by preserving biodiversity and respecting ecosystem dynamics.

The third International Rights of Nature Tribunal will be held on 4 and 5 December 2015 concurrently with the United Nations Framework Convention on Climate Change (UNFCCC COP 21) in Paris, France. This tribunal is hosted by the Global Alliance of the Rights of Nature in partnership with End Ecocide on Earth; NatureRights & Attac France.
